**Functional Capacity:** Functional Capacity is the result of comparing the actual use of a space in a facility against the original design intent of the facility. Functional Capacity better reflects the actual space constraints a school may be experiencing and helps in planning for individual facility needs, such as additional support spaces. This number can fluctuate annually depending on how a facility is programmed and when various support programs change.

**\*\*\*2017-18 Modified ADM:** This calculation focuses on students physically on-campus. The number does NOT include students attending various academic programs such as Scholars Academy, Early College, Academy for Arts, Science & Technology, Academy for Technology & Academics, Horry Education Center, or the Therapeutic Learning Center. It does include Child Development students, however Pre-K Self-Contained and Special Needs Self-Contained students are not counted (nor are the spaces in the facilities).
