

Discussion 4.A

Background Information: The Instructional Materials Division of the State Department of Education anticipates allocations to fully fund the subject areas up for adoption in the 2015-2016 school year. Selected materials will be placed in schools beginning August 2015. Recommendations are currently being made to support identified areas of **Cursive Writing 2-5, Economics 9-12, Social Studies 6 and 7 and CATE areas.**

All materials for this adoption went through the state public review process prior to consideration. The district adoption committee was comprised of teachers, curriculum coaches, school and district administrators, and a parent. School level representatives were instructed to vote based on input from all appropriate teachers in their schools.

Based on the recommendation of the district adoption committees, the following materials have been selected for use as described below:
