

South Carolina Code of Laws Section 59-63-95 authorizes school districts to obtain supplies of epinephrine auto injectors for schools to use in certain circumstances. State law authorizes certain school personnel to administer epinephrine auto-injectors to students and other people or provide epinephrine auto-injectors for self-administration. As prescribed by State law, the purpose of the attached "draft" policy is to establish the basic structure for the use of epinephrine auto-injectors in the District.
